OBJECTIVE

AUTOMATION and MANUAL Test Engineer with 2.5+ years of experience in quality assurance. Skilled in test case design, defect identification, and ensuring platform-wide coverage. Dedicated to delivering high-quality, user-friendly product through meticulous testing

EDUCATION

Bachelor of Mechanical Engineering,	2019 - 2022	7.0 CGPA
Chaitanya Engineering College , Vishakapatnam ,IND		
Diploma of Mechanical Engineering,	2016 - 2019	8.1 CGPA
Adity Polytechnic COllege, Surampalem,IND		

SKILLS

Technical Skills	Automation Scripts, Selenium, TestNG/JUnit, Maven, Git, GitHub, GitHub Actions, JIRA, XRay, Snowflake, Oracle, Manual and Funcitonal Testing, Agile Scrum Methodologies
Soft Skills	Analytical Mindset and Problem Solving, Clear Communication, Strong attention to detail, Time Management and MultiTasking, Quick Learner and Adaptable, Team Collabration, Ownership and accountability

EXPERIENCE

Automation Tester   DEC 2022 - Present
Wipro .Ltd   *Hyderabad, IND*

- Developed and maintained automated test scripts using Selenium WebDriver with TestNG in a Maven-managed framework.
- Executed functional, regression, UI, smoke, and sanity testing across standalone and web-based applications.
- Performed end-to-end testing on Snowflake and Oracle-based reporting systems.
- Identified, reported, and tracked defects using JIRA and X-Ray for multiple Agile projects.
- Received direct client appreciation for successful production releases in the Expense Manager project.

INTERN - Java Developer   Jan 2022 - Mar 2022
Wipro .Ltd   *Hyderabad, IND*

- Participated in hands-on Java development and testing activities during internship tenure.
- Gained experience working with Java, Spring Boot, and Oracle SQL in building web applications.
- Developed features for clinic management software with admin/patient modules and role-based access.
- Collaborated with backend and frontend teams using Agile practices.

PROJECTS

Expense Manager (EMR). Building and executing automated regression suites for financial reporting modules integrating Snowflake data sources. Developing Selenium WebDriver scripts with TestNG and Maven to validate reporting workflows and ensure data accuracy across releases. Contributing to improved test reliability in production deployments.

Amazon E2E Automation (In Progress). Developing an end-to-end automation testing framework for Amazon web flows using Selenium WebDriver, Java, TestNG, and Maven. Designed to execute cross-browser tests, validate workflows such as login, product search, cart operations, and checkout. The project demonstrates advanced use of Page Object Model, data-driven testing, and reporting integrations.
*(*Source code repository pending publication) (Try it here)

Personal Portfolio Website (In Progress). Designed and developed a personal portfolio website to showcase professional experience, skills, and projects. The frontend is built with HTML, CSS, and JavaScript, featuring dynamic animations and responsive design. Backend enhancements are planned to include form submissions and automated content updates. (Live Site)

ABC General Clinic. Developed a full-stack clinic management application using Java, Spring Boot, and Oracle SQL. Implemented role-based authentication for administrators and patients, enabling secure scheduling and reporting. Delivered end-to-end testing coverage and contributed to backend data validation processes.
